

Press release

VisIC's CEO Dr. Tamara Baksht, to take part in Global Semiconductor Alliance webinar

- **"At the helm": CEO Panel discussion**
- **July 8, 2020 9 A.M. PDT | 6 P.M. CET**

July 6, 2020

Nes Ziona, Israel

VisIC Technologies Ltd., a global leader in gallium nitride (GaN) devices for automotive high-voltage applications, will participate at the free of charge GSA CEO webinar

The semiconductor industry is entering an era of tremendous growth in multiple end-markets. GSA has assembled an exclusive CEO panel to discuss how companies are navigating through these challenging times.

The industry leaders and entrepreneurs will discuss the opportunities and challenges that companies face, as well as their advice on how to not just navigate, but capitalize during tumultuous times.

VisIC Technologies, a semiconductor high-power provider for the E-mobility sector solution, is in the middle of the pandemic that impact on the globally automotive industry. Dr. Tamara Baksht will give voice to her opinion about changes, challenges, and opportunities in the business ecosystem for the start-up company in a post-COVID economy.

VisIC Technologies Ltd.

VisIC Technologies is a world leader in GaN electronics for xEV applications, focused on high-power automotive solutions. Its efficient and scalable products are based on deep technological knowledge of gallium-nitride and decades of experience. VisIC is committed to provide a step function improvement in terms of size and cost of energy conversion systems and dedicated to high-quality customer support at all development phases. VisIC offers high power transistor products based upon compound semiconductor Gallium Nitride (GaN) material aiming to provide products for cost effective and high-performance automotive inverter systems.

About Global Semiconductor Alliance

The GSA is committed to providing its members with unique, compelling and tangible benefits. Our value proposition is strong and has attracted an impressive membership base and solid ROI for its leaders. GSA has received many accolades for its role and contributions to the semiconductor world. Today the ecosystem is increasingly expansive and complex. The GSA's new vision and increasing representation of the ecosystem to include semiconductors, software, solutions and systems best enables our members' success while maintaining our unwavering commitment to the semiconductor industry.
