Quick info

Location Nes Ziona, Israel

Start TBD

Type Full time

Job description

For the development of high-power printed circuit boards, a technician / practical engineer is needed for the laboratory.

Excellent ability in fine assemblies on printed circuits and familiarity with testing equipment.

The work includes assistance in the development, assembly, testing and complex experiments of printed circuits.

Traveling abroad is possible.

You are best equipped for this task if you have:

- Previous experience and high ability in fine soldering under a microscope.
- Reading electronic drawings and the ability to identify electronic components.
- Knowledge of testing equipment.
- English - at a high level: reading and writing technical documents.

Preferences:

- Relevant Education: Electronics Technician / Practical Engineer
- Experience in the field of power electronics
- Self-learning, team working
